Claims 1-11 are pending in this application.

Claims 1-11 are generic to a plurality of disclosed patentably distinct species comprising a mixture with two active ingredients: (i) a glyphosate-based ingredient; and (ii) a saponified or unsaponified fatty acid-based ingredient such as pelargonic acid, sodium salt of pelargonic acid, saponified or non-saponified soybean fatty acid or coconut fatty acid. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

To be clear, the above requirement means that applicant must elect for initial examination a single specific ingredient for (i) and a single specific ingredient for (ii), such as for example sulfosate for ingredient (i) and sodium salt of pelargonic acid for (ii).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
